# Photobooth App

Rate It! 

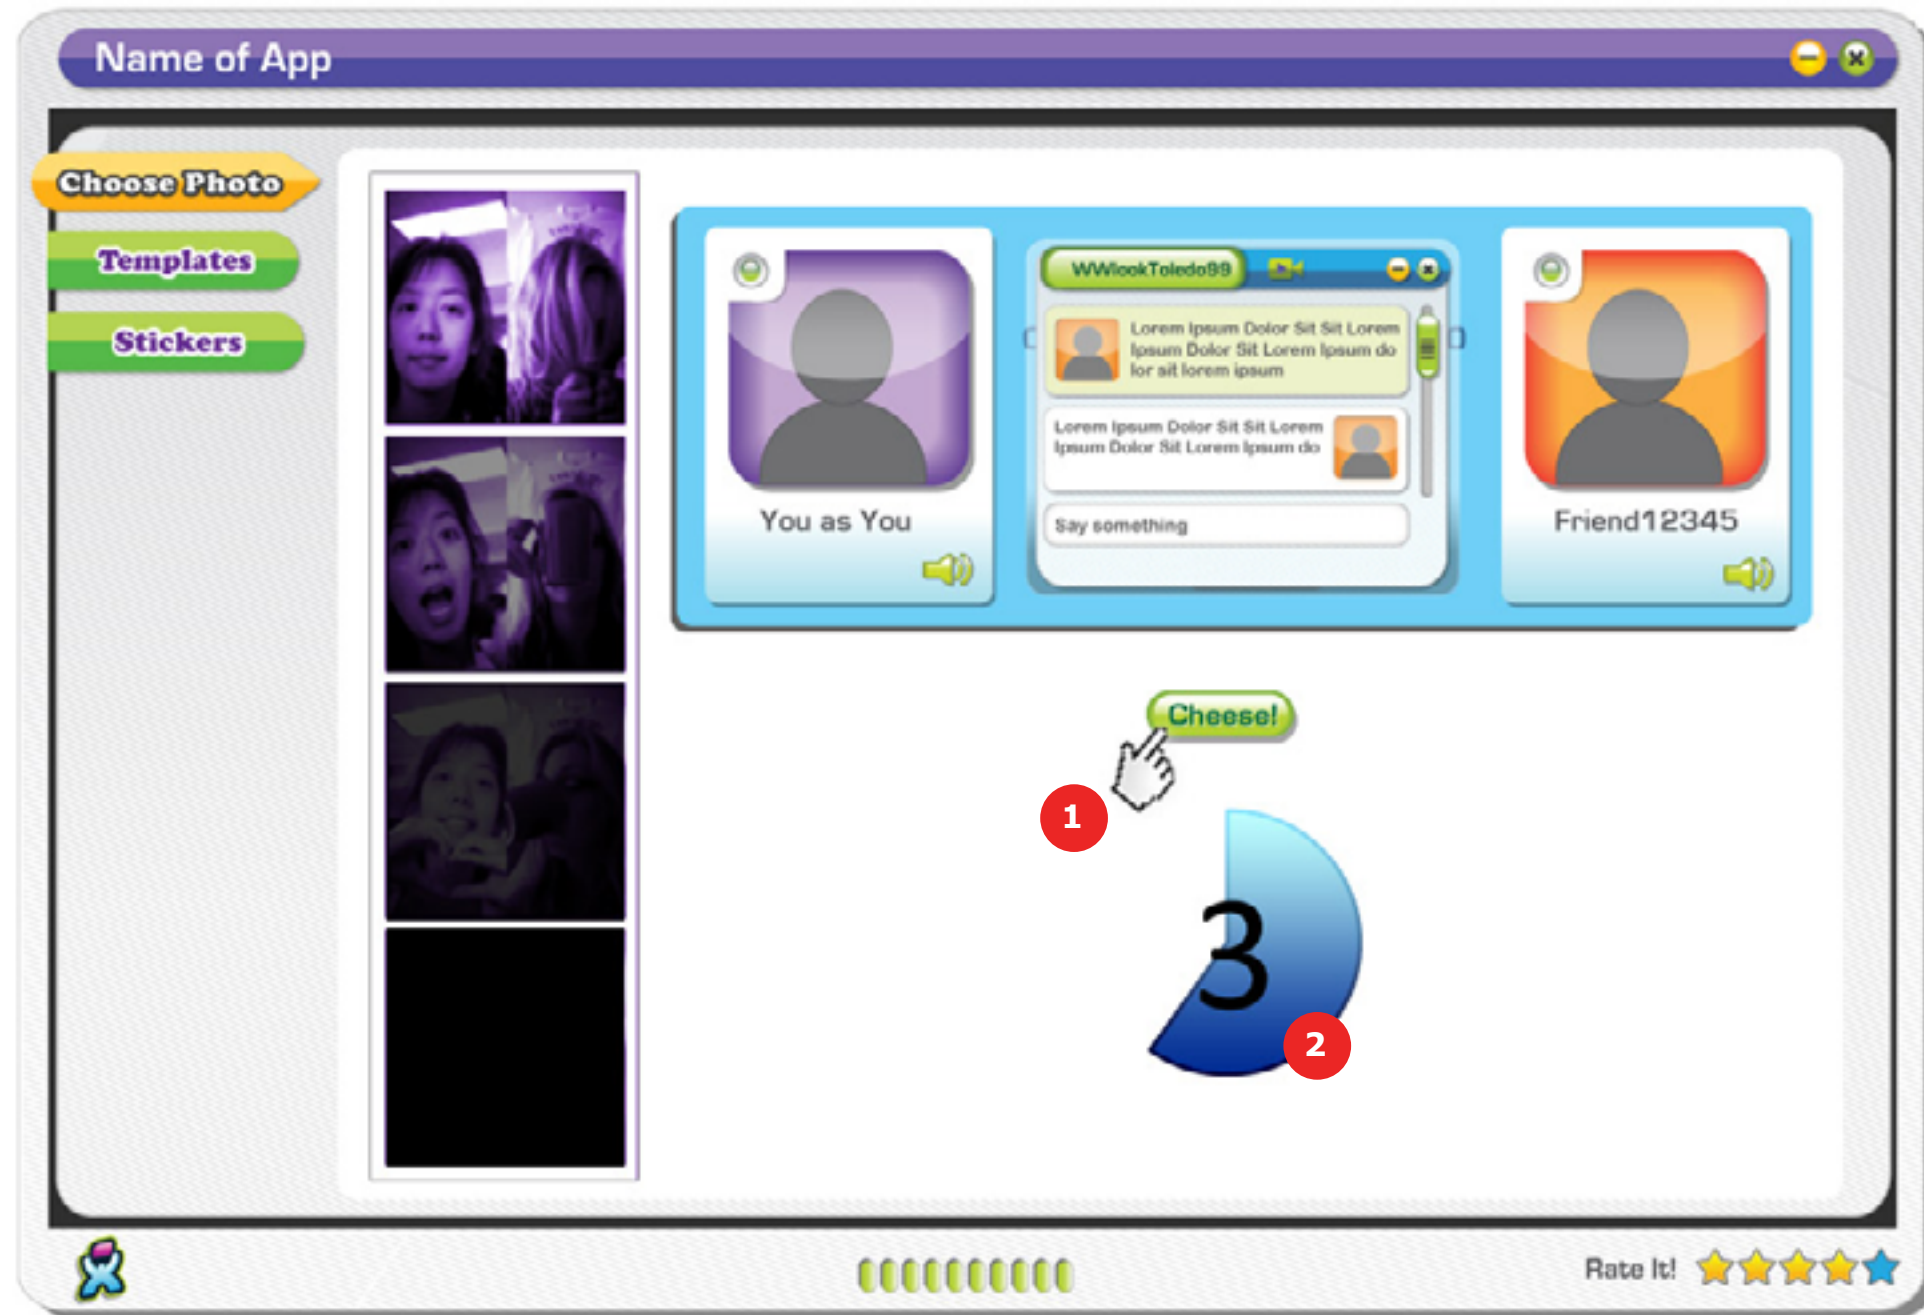

1. **Side Nav Buttons:** Choose Photo, Templates, Stickers. These can be selected in any order.
2. **Cloud/Tool Tips:** Used to give a “next step” tip if needed for every section. This could be a timed event if the user doesn’t click anywhere and it appears after 10 seconds or so. This could also be a direct link of an action item like uploading a photo.
3. **Marketing Splash Graphic:** Image collage showing examples of the creative app or whatever marketing chooses for display.
4. **Photo Well – Choose Photo:** Album selection component. A user can choose to use a Live Webcam, Images from their computer, Invite a friend by connecting over a LiveWebcam or the Albums from “MyStuff”.

1. **Invite a Friend webcam scenario:** After activating the section the users webcam activates with a live video preview. The Webcam must be activated by the Adobe “Allow” pop-up. The user can now scroll through and click to Invite a Friend from the bottom well.
2. **Live Webcam Preview:** After activating the section the users webcam activates with a live video preview.
3. **Invite a Friend Well:** The user can now scroll through and click to Invite a Friend from the bottom well.
4. **View All Friends:** If the user wants to see all their friends they can click the “View all” link and view a larger, scrollable pop-up.

1. **Choose Template Well:** The user can browse the templates for the Photo Strip. The templates may have suggestions of types of fun photo ideas to pose for
2. **Connecting to Friend:** Once they are both connected they can use the chat module or the webcam audio/video to collaborate and choose a template and photo pose together.

1. **Cheese!:** Once the user and their friend are ready they can hit the "Cheese" / "Take Photo" button.
2. **Countdown:** Each panel of the template has a 3 second countdown and displays a photo one at a time in sequence.

1. **Preview:** A preview of the Photo Strip is displayed
2. **Chat Module:** At this point both friends can chat and decide if they like the photo.
3. **Save/Finish/Approve Button:** When the user of the initial invite hits "Save/Finish Approve/Finish" it will automatically save to a MyStuff folder. This option will activate the Share Pop-up window.
4. **Close App:** By clicking the close app x icon, A friendly pop-up will appear asking the user if they really want to quit and lose their changes. If they hit OK, the user will quit the program and return to the Apps page.

1. **Preview:** After the user hits "Save/Approve/Finish" a Pop-up appears with a Preview of the finished file.
2. **Saved to My Stuff:** A graphic indicates that the users work has been saved to their personal "MyStuff" folder. This folder can be auto created to match the name of the creative app. The file can be auto named by user name and date/time.
3. **Comments box:** The comments box allows the user to write personal comments that will be posted along with the finished file to chatterbox and portfolio.
4. **Share Now Check Boxes:** These check boxes are automatically checked to motivate users to share their creative creations and promote the apps. But they can be unchecked if the user and friend wants to keep something private and saved into their MyStuff folder.
5. **Share/Cancel:** Users can post to their Portfolio and Chatterbox. If they hit "Cancel", the Photo will still save to their personal MyStuff folder called PhotoFilter App (name determined by marketing), and not post to their friends..
